

European Society of Sports Traumatology Knee Surgery and Arthroscopy (ESSKA)

Affiliation Duties 2018

ESSKA is the leading European organisation for Sports Medicine, Knee Surgery and Arthroscopy. Our members include orthopaedic surgeons, clinicians, scientists and physiotherapists whose goals include constantly striving to improve musculoskeletal function; research into and treatment of degenerative joint disease; and the improvement of the quality of life of all patients. ESSKA therefore meets these goals by the promotion of education and research through publications, meetings and our extensive range of Fellowships.

As an ESSKA Affiliated Society you should:

1. Disseminate information about ESSKA activity (such as the Congress, journals, educational programmes, courses, etc.) and ESSKA membership to your Society members;
2. Inform ESSKA of your congresses and other activities;
3. Allow ESSKA the possibility to distribute information materials (via the congress bags or even a booth) free-of charge at your respective meetings;
4. Inform about and invite ESSKA to collaborate on any other projects and activities you would consider to be beneficial for the wider European professional community.
5. Collaborate in any Europe-wide activities and programmes where information about national professional practices or benchmarks are crucial.
